

Lean Six Sigma

Green Belt Certification

“Good leaders create a vision, articulate the vision, passionately own the vision, and relentlessly drive it to completion.” Jack Welch

Summary

Opus Solutions offers the Lean Six Sigma Green Belt training as a high quality and flexible alternative to traditional training programs. Our expert trainers will work with you and your organization to determine the best training

schedule. Your training is designed based on business need and industry.

This training is designed for professionals charged with leading teams and projects focused on waste reduction, increased profitability, cost reduction, and improved customer satisfaction. Training covers the Six Sigma Define-Measure-Analyze-Improve-Control (DMAIC) methodology integrated with Lean tools and techniques. Each participant will complete an employer-approved project as part of the training. The participant will receive mentoring and coaching as necessary for successful project completion.

The Lean Six Sigma Green Belt training consists of coursework, instructor led sessions, project work, and session exams. Participants are required to complete an approved project resulting in bottom-line improvements in the range of \$10,000 - \$50,000.

Learning Objectives

The objective of this training is to gain a comprehensive understanding of the concepts and tools of the Lean Six Sigma methodology and be able to lead and execute high resulting improvement projects. Additional learning objectives include:

- Understand the DMAIC process cycle and implement it as a framework for improvement initiatives
- Connect Lean Six Sigma concepts to your business strategic plan and objectives
- Utilize the Lean Six Sigma methodology to evaluate the effectiveness of processes and apply improvement techniques
- Scope projects to ensure successful implementation and sustainable improvements
